SKT Retains Microsoft National System Integrator (NSI) Partner Designation

Deep experience, customer success and national reach enable SKT to continue to be 1 of 33 Microsoft NSI partners.

WICHITA, KS, June 26, 2009 – SKT Business Communication Solutions (SKT), a national leader in unified communications and collaboration solutions, announced today that it has been selected to remain a member of an elite group of partners selected by Microsoft as National Systems Integrators (NSI). Designated as one of only 33 partners in North America, Microsoft recognizes SKT for meeting national goals and objectives around significant expertise, business volume, and geographic diversity. The NSI partner program is highly sought after and puts SKT among a select group of top partners across the U.S.

The Microsoft NSI Partner Program was established for elite Microsoft partners to elevate their marketing and delivery strategies across multiple geographic and product segments. The objective of the NSI program is to increase Microsoft's focus and engagement with SKT which includes overall strategic planning, greater alignment and engagement of Microsoft field resources, collaborative marketing efforts and deeper product team engagement and executive sponsorship. The program is a partnership of high importance to both Microsoft and SKT.

"We are always looking for ways to differentiate ourselves." says Damon Martin, CIO,
"Continuing to earn our place in the NSI program is an honor and a testament to our continued commitment to our customers and their investment in Microsoft products."

To qualify for the NSI status, SKT had to meet stringent requirements including rigorous training, support capabilities and a proven record for national service delivery. SKT has been highlighted through case studies and references on Microsoft's site and is especially known for its competency in all aspects of Unified Communications, including voice, video, messaging and collaboration. SKT continues to impress Microsoft and customers with their knowledge and

understanding of how Unified Communications can transform a business in today's tough economic climate.
